

CASE STUDY:

INTERIOR DECORATION ON ACCOMMODATION SHIP ACTA AURIGA

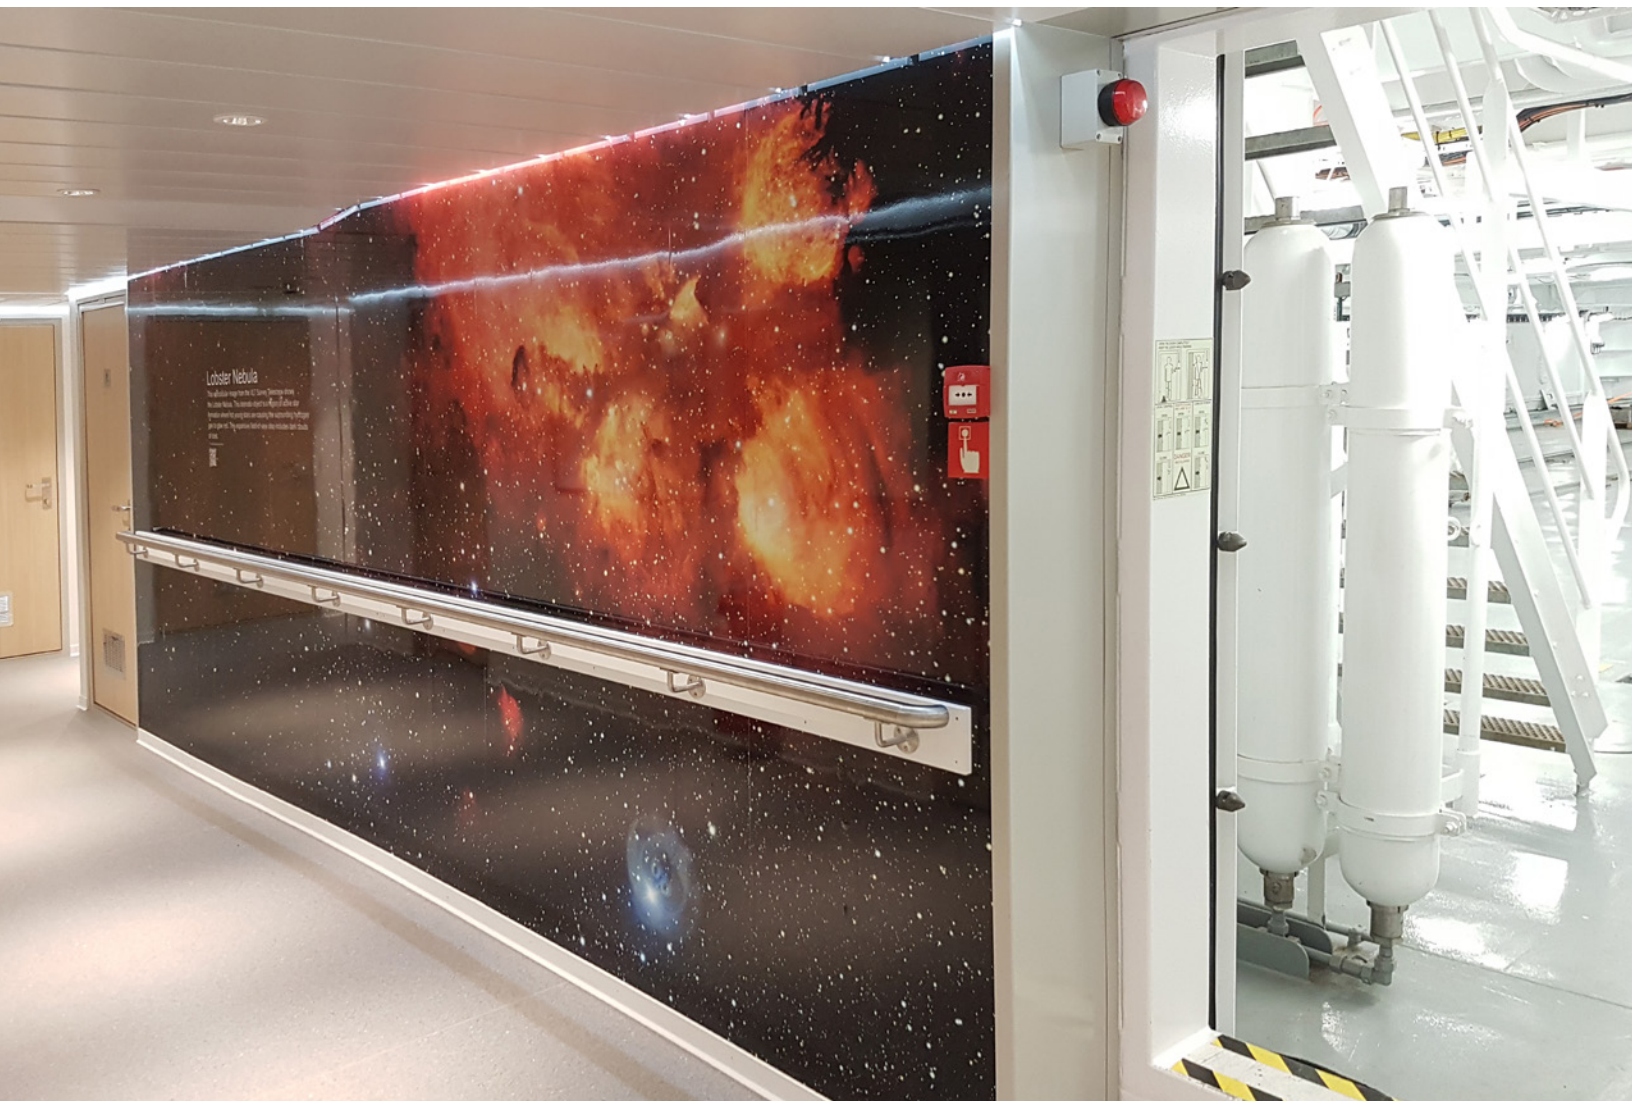

VIEWING THE UNIVERSE AND GALAXY AT SEA

ACTA MARINE is an independent maritime service provider and owns more than 40 working boats for coastal waters. These vessels are offered for charter around the world. This is for projects in the dredging and shipbuilding, oil & gas and offshore sectors. Especially shallow water operations are a specialty of the company. Since the beginning of 2018, the organization has a new vessel as a workboat, namely ACTA AURIGA. The vessel has the very latest technologies and is an asset to the above sectors. With this special ship comes an exceptional interior, which Blomsma Sign Company have provided.

In early 2018, ACTA MARINE launched their newest vessel the ACTA AURIGA. The new build vessel was built by Ulstein Verft AS and is designed as a construction support vessel. The ACTA AURIGA will be used as an accommodation service vessel, with capacity on board for 120 people, for various clients in the offshore renewable industry, including offshore wind farms. This state-of-the-art vessel is equipped with the very latest technologies. In addition, ACTA AURIGA has a length of 94 meters, a width of 18 meters and a draft of 5.6 meters. The vessel has sufficient deck space of approximately 1000m² for cargo storage.

The SMST motion compensated gangway provides a safe and flexible walk-to-work operation in characteristic wave heights (Hs) up to 3 meters. The walkway enables one to work on both sides of the vessel. The walkway is mounted on a height-adjustable integrated tower. The integrated elevator helps move people and cargo from different deck levels to the gangway platform without exposing them to the weather. Also, the ACTA AURIGA has a 3D motion compensated articulating boom crane. In offshore mode, the crane can lift 20 tons without compensation and 6 tons with compensation. It is possible to elevator 36 meters above the water level in height.

“Blomsma provided the interior with special full-wall prints and signage.”

EXCEPTIONAL TECHNICAL DESIGN

Blomsma Sign Company was commissioned by the architectural firm HofmanDujardin to provide the ACTA AURIGA with beautiful and attractive interior decoration. Several rooms have been provided with wall-to-wall prints and signage. The theme of the interior is our universe and galaxy. The material is scratch-resistant and easyclean high-gloss laminate that gives the images extra depth due to its thickness. A special detail about the decorations are the QR codes applied to some walls, which after scanning them, give more information about our universe and galaxy.

ACTA AURIGA is equipped with accommodation facilities, with the design's primary focus being "well-equipped personnel are productive personnel." For example, the ship offers 80 cabins in accordance with 'DNV Comfort Class level 2' for up to 120 people. The cabins and public areas are furnished with high-quality materials and features. In addition, ACTA AURIGA offers a state-of-the-art buffet restaurant, multifunctional public areas and sauna and fitness facilities. Staff have access to smart Wifi Connectivity to connect their own digital devices to the Internet and Video-on-demand services everywhere on board.

The ship is named after the constellation Auriga, Auriga meaning "the driver" in Latin. The driver plays a crucial role in logistics and support and is therefore indispensable in the field of combat. This is also the aim of ACTA AURIGA in offshore wind projects and/or related markets such as decommissioning (dismantling) and Oil & Gas projects.

ABOUT **BLOMSMA**?

Sign specialist

Blomsma Sign Company has been a leading specialist in the field of signage for more than 35 years. We do this for a very wide range of applications, from car stickers to illuminated advertisements and from outdoor signage to facade renovation. In many cases self-adhesive vinyl is the basis for this signage. This allows us to mount signage on a large number of different surfaces. Our motto is: "Service with an eye for detail and reality". We are problem solvers for companies, institutions and governments. From multinationals to freelancers with a home-based business.

Total Project Management

Our 'everything in one hand' concept is experienced as clear and complete. It is a tried and tested process of inventory, reporting, presentation, production and installation. For large and comprehensive projects and volume productions we form strategic project teams. Also in the areas of logistics, production and cutting solutions, our colleagues from the various departments advise and reinforce each other. They complement each other's expertise and product range. Together we speak the language of purchasers, facility managers, safety managers, fleet managers, communications staff, designers, architects, independent entrepreneurs and maintenance companies.

Part of a bigger Group of companies

Blomsma Sign Company is part of the Heijboer Group. The Heijboer Group was founded in 1979 and is now one of the largest sign companies in the Netherlands. The Heijboer Group has more than 110 employees and has offices in Zoetermeer (NL), Hoogezand (NL), Dinxperlo and Oldenburg (GER).

In total the Heijboer Group has several divisions, namely:

- Blomsma Sign Company
- Blomsma Signs & Safety
- Blomsma Safety Components
- T-ISS Safety Suppliers
- Safe Sign Products
- Nordic Sea Safe

3M™ Select Graphic Platinum Provider

Blomsma is a 3M™ Select Graphic Platinum Provider. This is the highest achievable level for suppliers in the sign market. This means that Blomsma Sign Company, on behalf of 3M™, can independently guarantee on behalf of 3M™. These guarantees are given on material, production and assembly. For you this means full project warranty and therefore optimal security.
